Khawaja Abdullah

Cyber Security and Information Security Professional

abdullahkhawaja.com
github.com/hax3xploit
medium.com/@hax.3xploit

Cybersecurity Professional with proven expertise in web and mobile application penetration testing, vulnerability assessment, and red team operations. Experienced in securing government and enterprise applications by identifying and mitigating security vulnerabilities. Skilled in offensive security techniques, reverse engineering, and security automation across diverse environments.

Key Skills:

- Proficient in Python, Bash, and PowerShell for security automation and tool development.
- Experienced in web and mobile application penetration testing, red team operations, and vulnerability assessments.
- Hands-on expertise with Burp Suite Pro, Cobalt Strike, Frida, Metasploit, Acunetix, and Nessus.
- Skilled in reverse engineering mobile applications and bypassing client-side security controls.

CORE COMPETENCIES

Penetration Testing, Web Application Security, Mobile Application Security, Red Team Operations, Reverse Engineering, Python, Bash, PowerShell, JavaScript, SQL, Burp Suite Pro, Cobalt Strike, Frida Framework, Metasploit, SharePoint Administration, AWS, Docker, Git, JIRA, SIEM, Linux Administration, Security Automation, Vulnerability Assessment, OWASP Top 10, SAST, DAST, Source Code Review.

JOB EXPERIENCE

Senior Red Team Operator / Tech Lead Cyber Security

Ministry of Interior Qatar (via Tech Mahindra Ltd.)

June 2024 — Present

Doha, Qatar

- Conduct penetration testing and security assessments of critical government web and mobile applications.
- Perform mobile application reverse engineering using Frida framework to identify security vulnerabilities.
- Deploy and manage Cobalt Strike C2 infrastructure for adversary simulation and security testing.
- Document security findings and present technical reports to government stakeholders.

Sr. Information Security Engineer

NETSOL Technologies Ltd.

Nov 2022 — May 2024

Lahore, Pakistan

- Conducted vulnerability assessments and penetration testing for web and mobile applications.
- Served as Engagement Administrator for SOC 2 Type II audit.
- Managed security operations including assets, vulnerabilities, incidents, and patch management.
- Monitored and analyzed security events using IBM QRadar SIEM.
- Implement SharePoint automation solutions and manage security projects through JIRA.
- Performed source code security reviews and cloud security assessments.
- Developed custom testing methodologies to identify application vulnerabilities.

Cybersecurity Engineer

Bridge Zones Inc.

Oct 2020 — April 2022

Islamabad, Pakistan

- Performed web application, mobile application, and network penetration testing.
- Developed security assessment processes and automation scripts.
- Conducted source code reviews and application security assessments.
- Provided technical consultation on security tools and controls.

Penetration Tester

Hassan Solutions SMC PVT LTD.

June 2018 — August 2020

Islamabad, Pakistan

- Performed manual security testing on web and mobile applications.
- Developed custom security testing tools and automation scripts.
- Identified and documented high-severity vulnerabilities in production systems.
- Conducted static code analysis and network vulnerability scanning.

KEY ENGAGEMENTS

Financial Sector (Pakistan & Middle East)

- Conducted penetration testing and bypassed enterprise security controls including XDR, EDR, and Microsoft Defender.
- Performed DAST and SAST on banking web applications.
- Executed credential dumping and lateral movement for privilege escalation testing.
- Identified critical vulnerabilities including monetary amount manipulation in banking applications.
- Conducted mobile application penetration testing and reverse engineering to bypass client-side security checks.
- Successfully bypassed root detection, jailbreak detection, SSL pinning, and encrypted traffic protections.

Government Sector (Qatar & Pakistan)

- Performed security assessments of national-level government applications.
- Conducted penetration testing of critical infrastructure systems.
- Assessed web and mobile applications for OWASP Top 10 vulnerabilities.
- Performed Active Directory security reviews and penetration testing.
- Developed MagiskTrustUserCerts module for Android 14.

Healthcare Sector (Pakistan & Middle East)

- Conducted penetration testing of healthcare web portals and vaccine management systems.
- Performed security assessments of mobile applications handling patient data.
- Evaluated Active Directory configurations and authentication mechanisms.

Industrial Manufacturing Sector (USA, Canada & Middle East)

- Performed vulnerability assessments of network infrastructure and servers.
- Conducted web and mobile application penetration testing using SAST and DAST methodologies.

EDUCATION

Bachelor in Computer Science, SZABIST, Islamabad

2017 — July 2021

INDUSTRY CERTIFICATIONS

- OffSec Web Expert (OSWE)
- OffSec Certified Professional (OSCP)
- Certified Ethical Hacker Practical (CEH)
- eLearnSecurity Web Application Penetration Tester (eWPT)
- eLearnSecurity Junior Penetration Tester (eJPT)

AWARDS & HONORS

- **1st Place** - DeconstruCT.F 2021
- **2nd Runner Up** - Pakistan's First Digital Cybersecurity Hackathon 2021
- **CVE Holder** - CVE-2022-48077 - CVE-2021-41643 - CVE-2021-41644 - CVE-2021-41645 - CVE-2021-41646
- **Badge of Honor** - moment.me (2014)
- **Hall of Fame** - getpocket.com (2014)
- **Hall of Fame** - BASF
- **Hall of Fame** - Rozee.pk
- **Hall of Fame** - United Nations
